Virulent Newcastle Disease (vND) in Chickens, Los Angeles and San Bernardino Counties

The California Department of Food and Agriculture (CDFA) has detected virulent Newcastle Disease (vND) in chickens in Los Angeles and San Bernardino Counties.

- CDFA and the U.S. Department of Agriculture (USDA) have scaled up their response to this incident, as more cases have been detected.
- CDFA confirmed that there are no commercial premises currently involved.
- CDFA confirmed that there is no public health risk due to this virus.
- Cal OES Agency Representative (AREP) is coordinating with California Volunteers and San Bernardino County OES to locate Spanish language interpreters to conduct surveillance (education/outreach).
- On 06/01/18, the USDA National Incident Management Team (IMT) will arrive at the Incident Command Post (ICP).
 - This team is composed of 17 members and the rotation is 3 weeks.
 - Based on a delegation of authority plan developed by CDFA, CDFA personnel will team up with each IMT section chief to ensure communication and coordination of the response.

Activations

- San Bernardino Operational Area (OA) Emergency Operations Center (EOC) is activated to Level 3 (lowest level) and will continue to monitor the incident.

SITUATION SUMMARY

Virulent Newcastle Disease (vND) in Chickens, Los Angeles and San Bernardino Counties (Continued)

Deployments

- 1 Cal OES Science and Technology Advisor deployed on 05/29/18 until 06/01/18 to the CDFA/USDA ICP as a Biosecurity Infectious Disease Subject Matter Expert with an operational period of 0700-1900 hours.
- 1 Cal OES Southern Region Senior Emergency Services Coordinator (Sr. ESC) deployed to the CDFA/USDA ICP as an AREP with an operational period of 0700-1900 hours.
- 1 Cal OES Logistics Section Chief (Log Chief) deployed to the CDFA/USDA ICP with an operational period of 0700-1900 hours.

Logistics

Per the Cal OES Southern Region AREP on 05/31/18 at 0747 hours:

- Cal OES Southern Region along with Cal OES Logistics continue to assist CDFA in identifying a facility to expand operations in the immediate area of the CDFA district office in Ontario, San Bernardino County.
 - AREP coordinated with the county and City of Ontario for possible use of a facility at the Ontario International Airport. The information was forwarded to the Logistics Chief and ICP Incident Commanders.

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

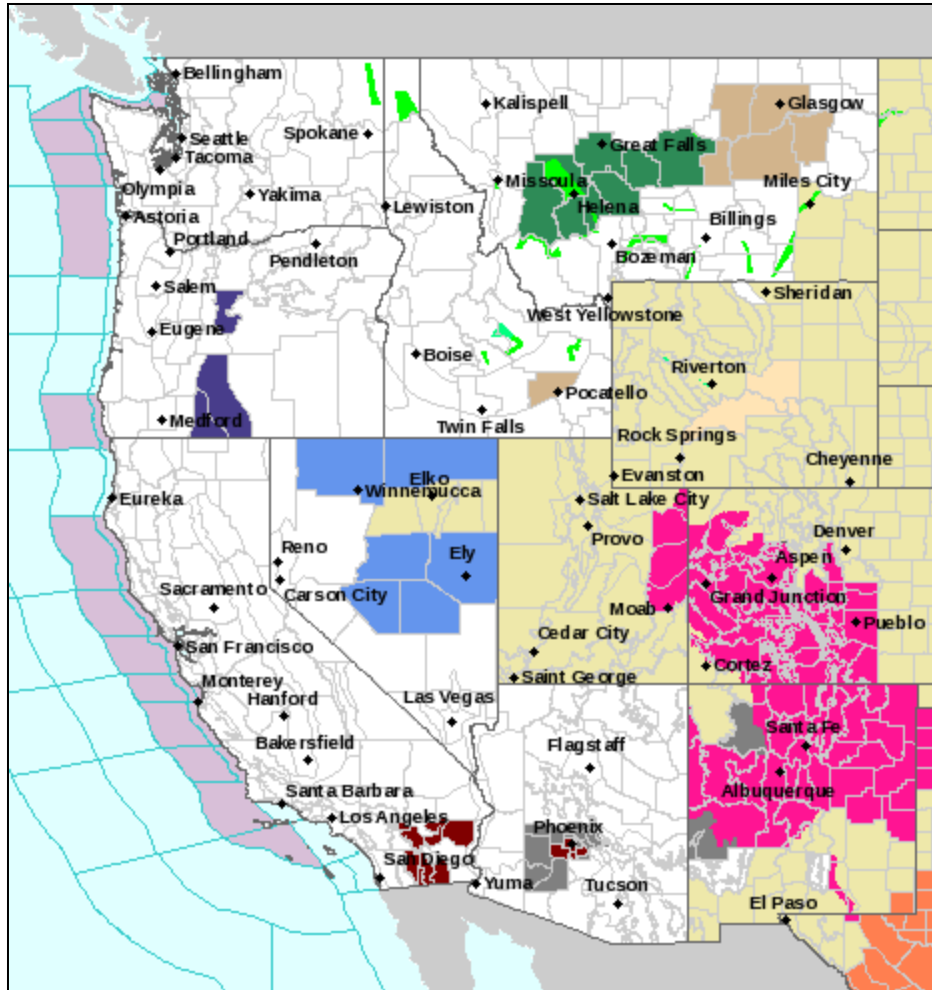

A drying and warming trend will start up today and last into the weekend. Afternoon temperatures will range between 5 to 15 degrees above normal. The wind flow overall will be light for the majority of the period although southerly winds should increase Sunday afternoon ahead of another Pacific trough. There should also be a brief period of light to moderate N-NE winds across the Sacramento Valley and adjacent foothills tomorrow morning.

Still expecting a trough passage for early next week. The models remain consistent with keeping the trough drier and accompanied with a cool down to near normal temperatures. The rest of next week is harder to predict due to the predicted flow pattern by the models although the current trend is drier.

SOUTHERN CALIFORNIA

A warming trend will develop today and last through next Monday. Highs over the weekend will climb into the upper 90s in the valleys to 110 in the low desert by Sunday. Minimum relative humidity (RH) will drop back into the teens over most areas below 7,000 feet away from the coast. But light winds should result in good recovery each night. Expect less marine layer coverage, but there will still be some stratus near the immediate coast each day. Next week, another trough will bring a slow cooling trend along with a return of onshore flow. However, temperatures next week will be warmer than this week overall. No thunderstorms are expected throughout the outlook period.
